JACK
SHAW

## AI, Blockchain, and the Digital Transformation of Healthcare

Healthcare providers, payors, suppliers, and IT companies are increasingly aware that Blockchain is an important emerging technology, but it is still not yet well understood by most healthcare professionals. Combined with such AI technologies and Machine Learning and Natural Language Processing, Blockchain promises to finally make Patient Mediated Health Data Exchange truly viable by providing patients with self-sovereign, patient-centered Electronic Healthcare Records.

But the implications of Blockchain for healthcare go far beyond just the EHR. Areas that these rapidly meerging technologies will help to dramatically transform over the next few years include:

- Healthcare Claims Adjudication and Payment
- Integration of such Medical devices as sensors, monitors, and wearables into the EHR
- Doctor-Vendor RFP Services
- Counterfeit Drug Prevention and Detection
- Supply Chain Provenance of Parts and Materials
- Health Document Notary Services
- Clinical Trial Results
- Population Health Management

Jack can also custom craft this presentation for Healthcare IT solution providers and …And, his programs can be delivered in-house to employees or to clients and prospects at customer conferences and marketing events.

Healthcare providers, payors, suppliers, and technology companies must understand the impact of Blockchain on their organizations and on the overall Healthcare Ecosystem. And they must understand the kinds of skills and capabilities they'll need to survive and prosper in the rapidly emerging digital healthcare environment.

Jack Shaw is a global thought leader and emerging technology strategist with over 30 years of experience in gauging the significance of emerging technologies for business. He was voted one of the top five Technology Futurists in the world in a poll conducted by Speaking.com. Jack keeps a pulse on shifts in technology, providing him the foresight to help industry leaders understand how emerging technologies impact their digital ecosystem -and how these technologies are practically applied both today and tomorrow. For healthcase providers, IT companies, and medicla technology companies, he has advised executives informing them regarding critical business needs. Jack has delivered over 1,000 keynote discussions and executive forums in 26 countries and every state across the U.S.
